

What is Claimed is:

- [c1] A smoking device comprising:
- a combustion chamber comprising a bowl for containing combustible material to be burned;
 - a mouth piece pipe communicating with the combustion chamber;
 - a piezoelectric ignition device extending into the combustion chamber above the mouth piece pipe and below the bowl for generating a torch flame capable of extending into the combustion chamber to ignite combustible material within the combustion chamber.
- [c2] The smoking device of claim 1 wherein the combustion chamber, bowl, and mouth piece pipe are formed of metal.
- [c3] The smoking device of claim 2 wherein the metal is aluminum.
- [c4] The smoking device of claim 2 wherein the metal is stainless steel.
- [c5] The smoking device of claim 1 wherein the piezoelectric ignition device further includes a fuel tank for gaseous fuel.
- [c6] The smoking device of claim 1 wherein the bowl and the mouth piece pipe are removable to facilitate cleaning of the device.

[c7] The smoking device of claim 1 further including removable covers covering the fuel tank.
